Work Experience

- **Applied Research Scientist** — Jan 2023 - Present
  Georgian Partners — *Toronto, Canada*
  - Upgraded a multimodal machine learning toolkit to support the latest versions of PyTorch and Transformers.
  - Utilized graph-based machine learning techniques for in-house applied research projects.
  - Developed a framework to preprocess & combine different text-to-speech (TTS) datasets.
  - **Tech Stack:** Python, PyTorch, Pytorch Geometric, Tranformers, GCP, Git
- **Graduate Research Fellow** — May 2021 - Dec 2022
  University of Alberta — *Edmonton, Canada*
  - **Meta Discovery for Game Balance:** Designed a reinforcement learning system to evaluate game balance.
  - **Debiasing Language Models:** Developed a framework, as a team of 3, to debias transformer models (BERT).
  - **Pixel Art Representation:** Designed the Pixel VQ-VAE, a computer vision model for learning pixel art embeddings. Further demonstrated its effectiveness in image generation & transformation.
  - **Tech Stack:** Python, PyTorch, Tensorflow, Transformers, Git
- **Machine Learning Engineer** — Aug 2019 - Nov 2020
  Mad Street Den (Vue.ai) — *Chennai, India*
  - Trained Transformer models (BERT, XLNet) for classification, entity extraction and language modeling problems.
  - Developed an end-to-end general purpose, config-driven framework for rapid prototyping of production-ready classification and named entity recognition models.
  - Upgraded existing systems using ML to boost precision by 15% & optimized the codebase to reduce latency by 40%.
  - Developed an experimental Sequence-to-Sequence model to generate retail product descriptions.
  - **Tech Stack:** Python, PyTorch, Tensorflow, Keras, Transformers, Django, Javascript, AWS, GCP, Git
- **Engineering Intern** — May 2019 - Aug 2019
  Mad Street Den (Vue.ai) — *Chennai, India*
  - Extracted keywords from 37 million retail products using a custom algorithm that combined NPMI and TF-IDF.
  - Implemented Word2Vec over 2 million retail product descriptions.
  - **Tech Stack:** Python, PyTorch, scikit-learn, AWS

Education

- **University of Alberta** — Jan. 2021 – Dec. 2022
  Master of Science (Thesis) in Computing Science; CGPA: 3.75/4.0 — *Edmonton, Canada*
  - **Thesis:** Visualizing Characters and Evaluating their Balance in Competitive Video Games
- **Anna University (Sri Venkateswara College of Engineering)** — Jun. 2015 – Apr. 2019
  Bachelor of Engineering in Computer Science and Engineering; First Class. — *Chennai, India*
  - **Thesis:** Natural Language Generation using Generative Adversarial Networks (Awarded grant of INR 10,000)

Programming Skills

- **Languages & Databases:** Python, MySQL, SQLite, MongoDB, HTML, CSS, Javascript, Markdown, C, C++.
- **Frameworks & Libraries:** PyTorch, Tensorflow, Keras, Transformers (HuggingFace), NumPy, Pandas, scikit-learn.
- **Tools & Technologies:** Git, LaTeX, Amazon Web Services (AWS), Google Cloud Platform (GCP)

Publications

- **FineDeb: A Debiasing Framework for Language Models:** Co-first author. AI4SG Workshop, AAAI 2023.
- **Pixel VQ-VAEs for Improved Pixel Art Representation:** First author. EXAG Workshop, AIIDE 2022.
- **Facial Emotion Recognition using Convolutional Neural Networks:** First author. AICV 2018.

Selected Projects

- **Homebrew Helper:** Developed & deployed a Discord bot for online role-playing games. (Python, MongoDB)
